

COA HOLDINGS, LLC is an active, registered member of the **Gallery Climate Coalition (GCC)**. We are fully pledged to the [Coalition Commitments](#), joining an international network of over 2,250 organisations and individuals across 65+ countries dedicated to systemic climate action within the visual arts.

Through our partnership with GCC—a registered charity delivering open-access sustainability frameworks—we align our operations with institutional decarbonisation targets. We actively utilise GCC’s guidelines to lead our environmental stewardship, encouraging our global network of artists, institutions, and collectors to adopt sustainable practices.

Key resources driving our operational strategy include GCC’s [Decarbonisation Action Plan](#), the [Artist Toolkit](#), and their comprehensive [Best Practice Guidelines](#), which target the primary sources of carbon emissions across the sector.

To maintain complete transparency and rigorous accountability, COA HOLDINGS calculates its annual operational footprint using GCC’s official [Carbon Calculator](#). Our carbon reporting and progress data are published annually via our platform.

We invite our international network to join the movement by registering with the Gallery Climate Coalition [here](#).
